

RACKSPACE COLOCATION

Secure your hardware in our world-class data centers.

What do you do if you need to get out of your data center while also relying on applications that aren't suited for the cloud? One solution is Rackspace Colocation. You may be living with the reality that some applications require significant refactoring before they can be moved to a new infrastructure platform. Or you may have a financial incentive to realize the entire book value of your existing hardware investment. If you're faced with these challenges, a colocation solution can allow you to accommodate your legacy applications, make sound financial decisions and position your business for cloud success in the future.

WHY RACKSPACE FOR COLOCATION?

With Rackspace Colocation, you don't have to make a trade-off between getting the most out of your existing hardware and setting yourself up for a future in the cloud. We make it possible for you to deploy and manage your existing infrastructure within our best-in-class data center facilities while partnering with the leading multi-cloud services provider and eliminating the hassle and cost of running your own data center.

KEY FEATURES AND BENEFITS

Rackspace Colocation is currently available in select data centers across North America, Europe and Asia, and offers the following features and benefits:

Built-In Redundancy: Our data centers are built with multiple layers of redundancy – including physical security, power, cooling and network redundancies. This makes our data centers more resilient, so you can benefit from greater uptime and reliability.

Easy Billing: Colocation capacity is reserved by the kilowatt (kW) and is billed monthly beginning at 4 kW per rack.

Cross-Connectivity: Rackspace provides cross-connects for direct access to the public cloud (AWS, Azure and GCP, for example), private cloud, third-party data centers, or the Rackspace managed hosting environment of your choice.

Added Security: We employ multi-level physical and network security protocols, including biometric authentication and 24x7x365 surveillance.

Immense Bandwidth: You get the performance gains of blended bandwidth across our global network of internet service providers.

Smart Hands Service: You can access Smart Hands service via the customer portal to have our professionals perform hardware installations, drive swaps or cable-management tasks.

Industry-Leading SLAs: We offer aggressive SLAs and guarantees, including:

- 100% Network Uptime Guarantee
- 100% HVAC and Power Guarantee
- Smart Hands Guarantee:
 - We guarantee that we will begin work within one hour of the Smart Hands request
 - We guarantee that work will be completed within 24 hours of the Smart Hands request

TRUST RACKSPACE

- A leader in the 2018 Gartner Magic Quadrant for Public Cloud Infrastructure Managed Service Providers, Worldwide

EXPERTISE

Our data centers are rich in connectivity and cloud on-ramps, providing direct, private connections to the top hyper-scale public cloud providers in addition to Rackspace's multi-cloud and managed hosting platforms. And when you're ready to consider private cloud, public cloud, virtualized platforms or bare-metal hosting, we have the expertise you need to guide you on your digital transformation path.

SERVICE

Rackspace delivers **Fanatical Support**[®] – it's the specialized expertise and 24x7x365, results-obsessed customer service that's been a part of our DNA since 1999.

DATA CENTER EXPERTISE

Our highly trained engineers monitor our systems around the clock, constantly overseeing the security and uptime of our infrastructure. To create a highly resilient environment for your business-critical apps and data, we've built in multiple layers of redundancy. Our physical security, power, cooling and networks are each at least N+1 redundant.

A PARTNER FOR DIGITAL TRANSFORMATION

Rackspace offers broad expertise and a portfolio of services across leading cloud platforms and technologies. We help you tap the power of the cloud without the pain and expense of managing it all yourself. If your cloud strategy or digital transformation plans include moving your applications to a private cloud, public cloud, virtualized or bare-metal platform at some point in the future, Rackspace is the only colocation provider that can guide you step by step to the optimal technology platform for each of your unique workloads. When you rely on our expertise for the day-to-day operations of your cloud, you're free to focus on your core business and find new ways to innovate.
